

## Is it important to you how the energy you use is generated?

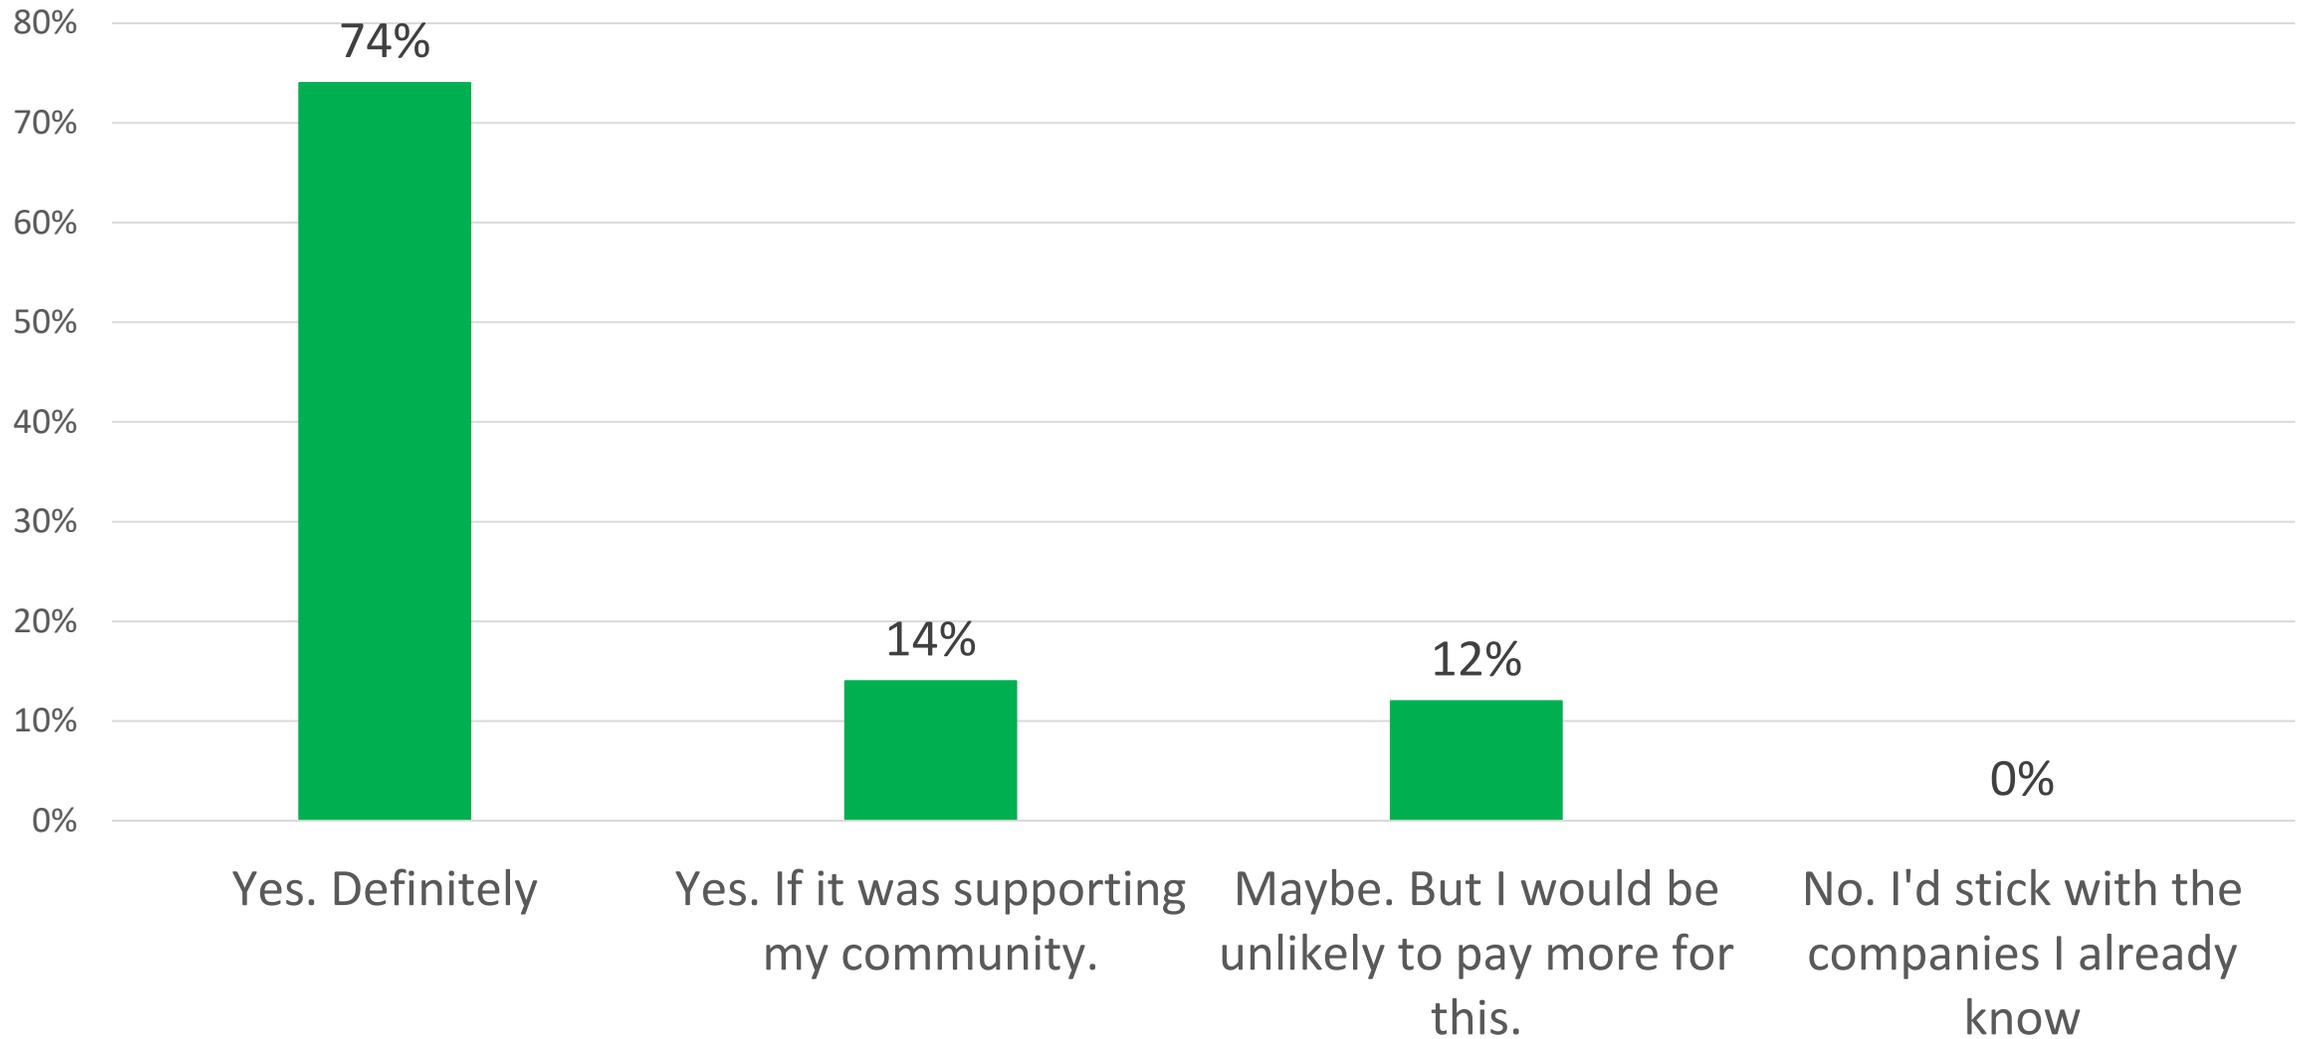

## Which of these are important when picking an electricity supplier?

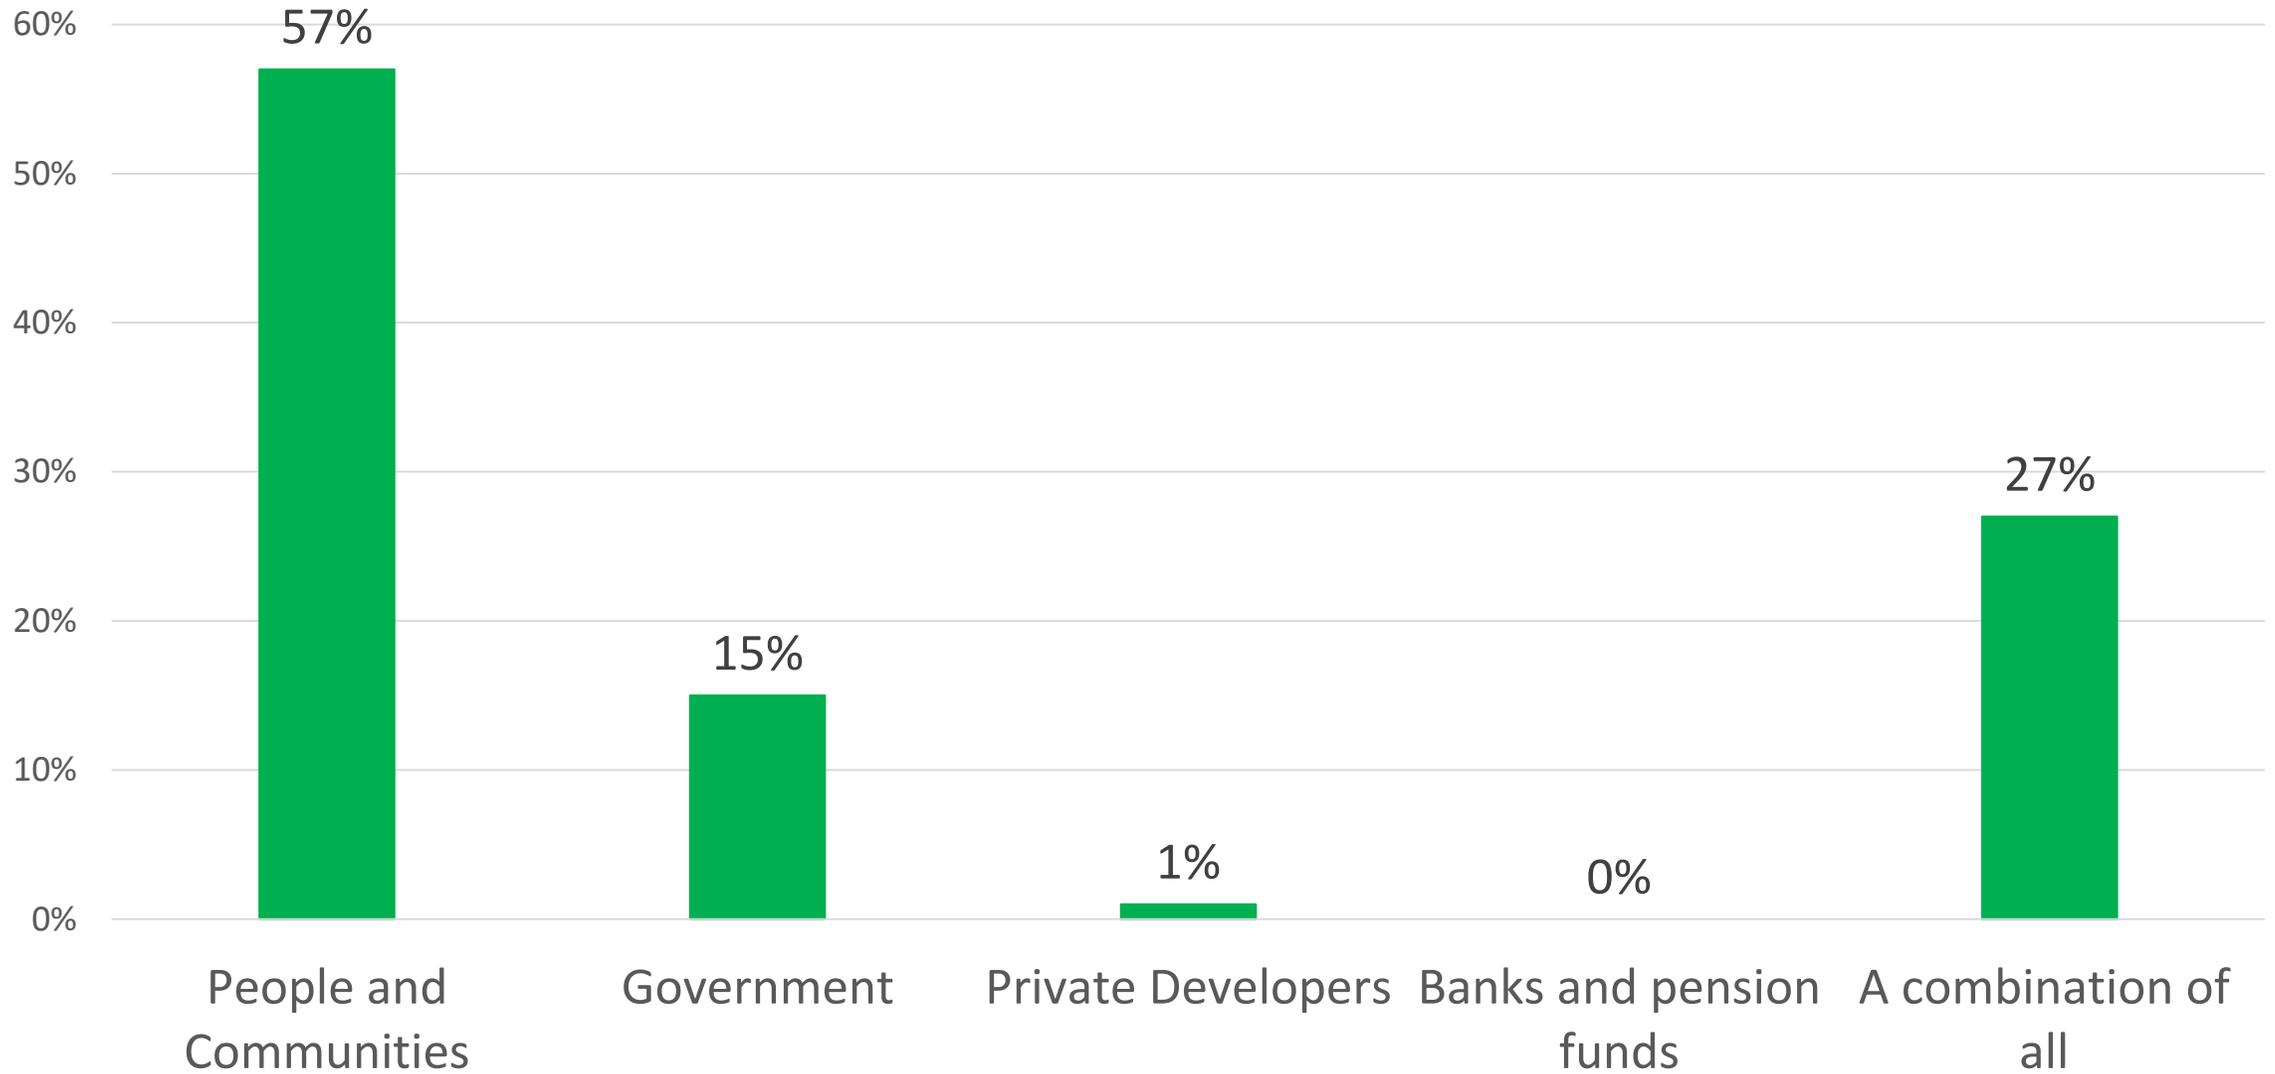

Would you like to own a share in a renewable project (like a wind farm or solar farm)? (\*if the cost is reasonable)

Would you like to buy your electricity from a supplier who supports renewable energy and community owned energy projects?

## Who do you think should own Ireland's energy?

There will be a Community Power Co-operative launching in early 2019. Can we contact you again about it?
