Est 2016

What is our polling methodology?

Stage 1: Where do your participants come from?

Using random digit dialling and online ads Ireland Thinks has built a panel of approximately 25,000 people, the equivalent of Thomond Park Stadium who are happy to participate in our monthly polls. This is continually topped up through advertisements targeting specific demographics as and when they are needed.

Stage 2: So, these are surely highly engaged people, how are they representative?

No. For our polls our algorithm chooses 5,000 specific individuals to take part. They are chosen on the basis of their demographics and behaviours (age, gender, religious adherence, educational attainment, past voting behaviour, political interest etc.) to ensure that they are an **exact replica** of the census and within that, the most recent general election exit poll.

Note: This algorithm minimises design-effect error, meaning that cross-tabs tend to be more reliable.

Stage 3: So how do you contact them? And how do you know the right person is answering?

Participants are sent an SMS message with a unique URL to participate in the opinion poll. Over 90% of the population own a smartphone, far fewer are at-home during the day (for face to face), use land-lines, or respond to unsolicited calls, or emails. Any duplicated entries from the same URL are deleted as is the user. Respondents must also match the data we have on record for the respondent.

Note: Here we minimise social desirability bias and non-response bias.

Stage 4: How long does it take? How do I know they're responding accurately?

We get over 1,000 responses within 3 hours, rising thereafter. The respondents experience is central to ensuring that we have quality responses. The polls are short, enjoyable and participants are rewarded by selecting the charity that we will donate to and results are published in a national newspaper. The responses are weighted to ensure that they are exactly representative of the population in terms of the same demographics above.

Note: Finally we minimise respondent error and sampling error.

Polling Report for Friends of the Earth

Polling was carried out in two waves for Friends of the Earth, in July and September. The results of these polls are given below.

Questions 1,2,4,5,6 were carried out in the September wave and questions 3,7,8,9 in the July wave

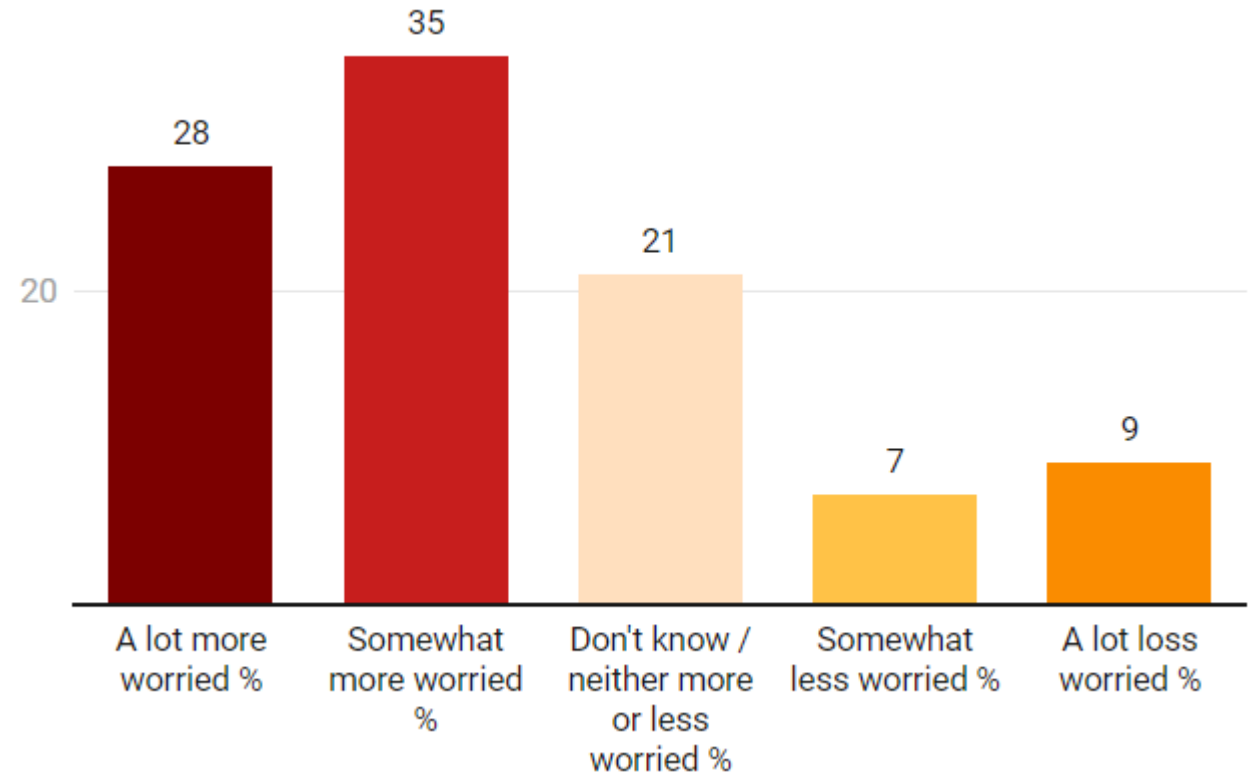

**July Wave: Carried out on 3rd July, 2023
with a sample size of 1,413 (Margin of Error: +/- 2.7 per cent)**

**September Wave: Carried out on 25th September, 2023
with a sample size of 1,060 (Margin of Error: +/- 3.1 per cent)**

**Section 1:
Results**

[Q1] Climate Worries Increasing

“Are you more or less worried about the impacts of climate change than you were two years ago?”

[Q2] Government performance – Not enough

“Which of the following statements best describes your opinion on whether the Government is doing enough to cut Ireland’s climate pollution in line with the limits that have been adopted by the Dáil?”

The Government is not doing enough, fast enough, to cut Ireland’s pollution

46

The Government is doing the right amount, as fast as practical, to cut Ireland’s pollution

27

The Government is doing too much, too fast, to cut Ireland’s pollution

26

[Q2] Government performance – Not enough

[Q3] Evaluating leaders on climate change

“How serious do you think each of the following are about taking actions to tackle climate change? On a scale of 0 to 10, where 0 is a politician that is strongly opposed to responding to climate change and 10 is a politician strongly prioritising the response to climate change, please evaluate...”

[Q7] SUVs

Climate activists have recently started deflating the tyres of SUVs outside people's homes in Dublin to highlight the impact larger cars have on pollution congestion and road safety for pedestrians. Would this make you more or less likely to buy an SUV as a family car?

[Q7] SUVs – Green Party Supporters most influenced by SUV deflations
